

SCOLIOS-US

Scolios-us is a web-based platform intended to empower scoliosis patients with the tools and resources they need to be successful brace-wearers.

Our mission is to guide scoliosis kids and teens through treatment by giving them an authentic look into scoliosis bracing, physical therapy, and surgery. Instead of feeling like an exception, we strive to help scoliosis kids and teens feel included and welcomed into the Scolios-us community, creating a social support network with the common goals of coping and thriving with scoliosis. Our vision is to bridge the gap between scoliosis healthcare providers and patients. We are committed to advocating for holistic scoliosis treatment.
